

## Fax environments built to industry standards

AccuRoute is a single platform and fully integrated approach to automating and accelerating business process workflows. Our fax technology tells your documents where to go and what to do when they get there — securely and effortlessly.

### On-Premise Fax

The same great local, secure, and reliable infrastructure traditionally offered by AccuRoute, designed with infinite scaling capabilities. On-Premise Fax allows for deep integration into a business's existing infrastructure, from the front end with integrated MFP Panel Buttons, to the end destination of a DMS, such as iManage or NetDocuments.

- Great for large organizations with high volumes
- Can leverage traditional fax hardware as well as FoIP
- Redundancy, failover, and load balancing
- Supports AccuRoute modules

### Hybrid Fax

Offers the same benefits of a local environment as On-Premise, but with the addition of Cloud Fax capabilities. By adding the Cloud Fax module to AccuRoute On-Premise, you are able to offload the burden of maintaining fax hardware, while taking full advantage of everything AccuRoute has to offer. It's the best of both worlds.

- Can be built into existing AccuRoute environments
- Ultimate set up for the greatest flexibility
- Redundancy, failover, and load balancing
- Supports AccuRoute modules

### Cloud Fax

AccuRoute CloudFAX allows for anywhere faxing using the online portal to send secure faxes. Integrated with email providers such as Outlook and Gmail, AccuRoute CloudFAX is the ideal solution for those needing a reliable, secure, and PCI DSS Level 1 certified fax service to send important and potentially sensitive information.

- Simple faxing via email and desktop
- Perfect for SMB enterprises that want lower responsibility
- Redundant
- InterFAX Salesforce API
- Device support through email

**Upland AccuRoute** helps organizations accelerate business processes by automating data capture and extraction using optical character recognition (OCR) to securely process through workflows to applications, people, or storage. With AccuRoute, users can easily capture, process, deliver, or fax content from any device using a single, unified platform.

## AccuRoute Fax Environments

### ON-PREMISE

The same great local, secure and reliable infrastructure traditionally offered by AccuRoute. AccuRoute allows for deep integration into a business' existing infrastructure, from the front end with integrated MFP Panel Buttons, to the end destination of a DMS, like iManage or NetDocuments.

### HYBRID

Offers the same benefits of a local environment as On-Premise does, but with the addition of Cloud Faxing Capabilities. The addition of the cloud fax module to AccuRoute On-Premise lets you off-load the burden of maintaining fax hardware, while taking full advantage of everything AccuRoute has to offer.

### CLOUD

Allows for anywhere faxing, using the online portal anywhere that has internet services to send secure faxes. Integrated with email providers such as Outlook or Gmail, and PCI DSS Certified, AccuRoute Cloud Fax is the ideal solution for those needing a reliable and secure fax service to send important and potentially sensitive information.

AccuRoute is a single platform and fully integrated approach to automating and accelerating business process workflows. Our fax technology tells your documents where to go and what to do when they get there — securely and effortlessly.
