InterFAX and Vertafore

InterFAX is the world's only PCI DSS certified and HIPAA-compliant API fax solution provider. Our adherence with global data security standards makes our cloud fax service the ideal pairing with AMS360™, powered by Vertafore.

User-friendly, fast, and secure insurance certificate cloud fax distribution.

Boost efficiency in minutes.

All Vertafore subscribers can conveniently fax insurance certificates directly from the general distribution list and can also benefit from secure email-to-fax technology.

- InterFAX seamlessly integrates with AMS360 to enable users to communicate easily, reliably, and cost-effectively.

- Empower staff by allowing for bulk distributions to be sent by multiple users simultaneously, streamlining processes and saving time without tying up a phone line.

Ensure security and resiliency.

InterFAX cloud faxing is PCI DSS Level 1 certified and adheres to HIPAA, PHIPA, and ISO 27001 regulatory standards.

- Deliver secure, cloud-based, enterprise-grade faxes and documents while meeting rigorous industry compliance standards.

- Smoothly migrate from on-premise fax to a secure, auditable cloud fax and distribution solution. Port in your existing fax number to ensure continuity for clients.
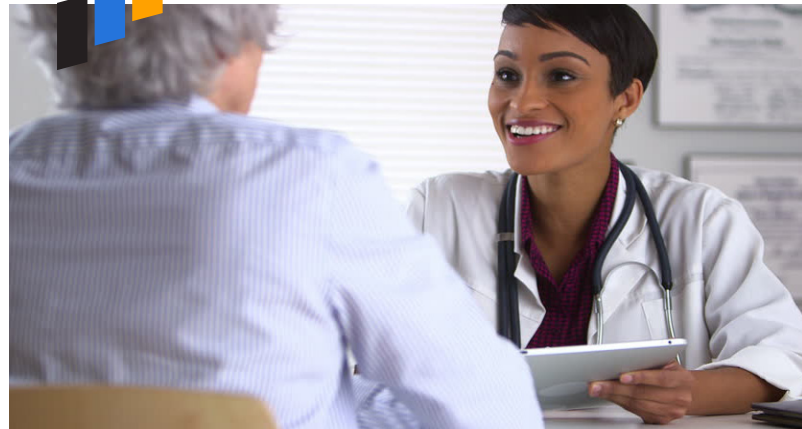

Vertafore and InterFAX

Paired with AMS360, InterFAX offers a reliable cloud fax service to streamline work, save time, and ensure secure processes around the bulk distribution of documents for busy workers.

Easily set up profiles

Using the "Fax Profile Setup" screen, each AMS360 user can set up a general agency profile or a personalized profile, depending on their needs.

Create individual certificates

After each Certificate Holder is selected, the system will display the entire list and create the individual certificates. The user can easily chooses their own fax profile. Each Certificate Holder can define whether they prefer to receive a printed copy, a fax, or an email.
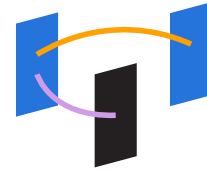

Distribute via fax or email

Once the user has chosen their fax profile, they can easily create an email greeting or fax cover page and edit distribution details for recipients, if necessary. Once all choices have been determined, emails and faxes are securely and automatically sent from the system simply by clicking "distribute".

Verify delivery and automatically archive

Upon completion, the user gets visual verification that the certificate was sent to all recipients using the methods selected (email, fax, or print). A full record of every transaction is also routed to the customer's activity file for secure storage and later reference.
